Our center provides a warm, loving environment that supports strong relationships between caregivers, children, and families. Teachers implement a child-centered, play-based curriculum that strives to challenge children and scaffold their growth in all areas of development. Our classrooms are designed to promote hands-on learning and independent exploration, including opportunities for physical, social, and cognitive enrichment. Teachers have the ability to meet children’s needs on an individual basis, and encourage families to become partners in their child’s care.
